

AN ISO 9001 : 2015 CERTIFIED COMPANY

Luxurious Bath Fittings

www.praybathfitting.com

**EXCLUSIVE
COLLECTION**

About Us...

Dency Enterprise is a name to trust for high quality range of CP Bathroom Fittings and accessories in Jamnagar. Our company is known as one of the leading manufacturers and suppliers of innovative designed range of CP Fittings, CP Bathroom Fittings, Water Taps and Bathroom Accessories. Our range is class apart and the designs compete with the best available in the market. We have advanced facilities for designing and manufacturing that assist us to meet the requirements of the most demanding customers.

We differentiate ourselves from others in the factor that we strive to make quality products at affordable rates. Decades of experience strong infrastructure and efficient production policies are key to our success in establishing a reputation for providing better quality at reasonable rates.

Our **Vision**

Our vision is to become a global supplier of bathroom accessories and fittings with optimal quality and innovation. Not only this, the purpose is to deliver top-notch bathroom-fittings without burning a hole in one's pocket while keeping in mind our customers' needs since we believe in 'Loyalty is Royalty'.

Our **Mission**

Manufacture and supply products to the highest quality standards, through innovation, excellence of service and value. To encompass the respect of our employees and respect long-lasting relationships with customers and suppliers.

Total dedication to quality of products.

Committed delivery.

All Sorts of after-sales support to customers.

Swift query resolution.

MANUFACTURING PROCESS

Manufacturing Process Consists Of Casting, Mechanical Processing Which Includes Machining, Grinding And Polishing, Electroplating, Assembling, Water Testing, Packaging. We employ best technology in field of bathroom fittings manufacturing.

Casting and Moulding

The casting and Moulding process is done via core, which leads to the production of internal cavities and reentrant angles, that is, angles greater than 180 degrees. After that, the cores are destroyed and the inserted piece is taken out.

Also, the faucets' main body is obtained via die casting, where the metal, in this scenario, brass, is melted at a high temperature and then transferred to moulds of the desired shape. The die casting method is employed to ensure dimensional consistency, flawless surface quality, and extreme precision of the bath fitting.

Machining of the Faucet

This process includes the usage of machine tools such as milling, lathe, drilling, and boring to further ensure that the surface of the metal after die-casting is error-free, of top-notch quality, and meets all the requirements and standards. Moreover, through the machining process, the water passage is also smoothed.

PRODUCT FEATURES

THREE STEP ELECTRO PLATING

Two Nickel layer and one Chrome layer gives excellent chrome finish for long life.

EASY TO INSTALLATION

With help of our instruction easy to install.

EASY TO USE

Smooth handling with comfort.

QUALITY ASSURANCE

Everything at PRAY comes with a seal of exceptional quality.

ECO-SAVE TECHNOLOGY

Aerator save 20% water with O₂, aerated stream flow.

DESIGN FOR EVERYONE'S NEED

PRAY have design to suit all style of bathrooms.
